

Services

- **Repetitive commercial quantities** of steel fabricated parts: short, medium & long production quantities.
- **Mild and high tensile steel** assemblies and components.

Discriminators

- ✓ Laser cutting of Steel, Alloy and Aluminium from 1mm to 25mm depth from 2D & 3D CAD designs
- ✓ Cutting, pressing, machining and fabrication all under one roof
- ✓ Crop, guillotine, saw, cold saw, laser cut and profile cut a variety of steel sizes, shapes and grades

Capabilities

❖ Steel laser cutting

High powered 10 kilowatt Prima Power, laser cutting to 25mm depth - high speed cutting accuracy. BLS laser available for 6m long steel.

❖ Oxy steel profile cutting

CNC controlled to 250mm depth, clean cutting of thick steel.

❖ CNC Brake press forming

Five presses, up to 400 tonnes power and 6m long die; high volume flexibility.

❖ Fully Automatic Robotic MIG welding (to 500 amp)

Consistency of form and finish & Special Purpose welding

Key Customers

Hendrickson Asia Pacific Pty Ltd
Land 121 phase 3

High tensile steel truck suspensions

Thomas Warburton Pty Ltd
Land 121 phase 3B

Steel tool boxes

Quality & Accreditation

- ISO9001:2015 Certified by SAI Global
- CNHIndustrial (Iveco) Supplier of the Year 2009
